

Introducing the new
TrueTalk 2
speech fluency rater.

The *TrueTalk 2* is the successor to the original *TrueTalk Professional* speech rating tool, as used by Speech Therapists worldwide.

Now completely redesigned, it offers numerous improvements and new features, while retaining the same familiar key layout and rating session screen:

00:00▲	\$ 0.0%	S/m	0.0
S#	0	\$#	0
		\$/m	0.0

New Features

- **Multi-Rate** – supports rating of up to 9 clients simultaneously
- **Rate-Alert** – provides audible warning when speech rate exceeds a user-defined value
- **'Time Out' light (optional add-on)** – with manual and automatic triggering
- **Customised start-up screen** – ability to display owners name and phone number
- **Improved Setup Menu** – now multi-screen and includes '*restore default settings*'
- **Storage box** – custom made protective foam carton ensures safe delivery and storage
- **No contrast adjustment required** – ever!
- **Low battery warning**
- **Runs off a single AAA battery cell** – which should last for more than a year of normal use.

User Configurable Rating Parameters

A completely revised and far more intuitive multi-screen setup mode is accessed by holding the SETUP button for at least one second. This helps prevent accidental configuration-changes which were common with the original TrueTalk. User configurable parameters include:

session time limit; timer direction; session syllable limit; auto-timer-pause; auto-pace-pause; rate-alert value; number of clients; timeout light error threshold and duration; restore-default-settings.

Quality & Support

Locally designed and manufactured in Australia, in collaboration with practising professionals, the TrueTalk-2 features a rugged plastic case, large rating display and extended endurance syllable entry keys. The syllable entry keys provide quiet, tactile feedback and will last in excess of 1,500 hours of continuous use. The keys are easily held depressed for the 'auto-pause override' feature.

The TrueTalk-2 is backed by a two year warranty, with phone and email support provided directly by the designer.
